ÉCONOLOGIS: GOOD FOR YOUR COMFORT, AND THE ENVIRONMENT

The Éconologis program provides free help for low-income households to improve energy efficiency and comfort levels in their homes, whether they are tenants or owners.

Program goal

Provide personalized advice and products to improve energy efficiency, regardless of the type of energy used for heating.¹

Period

The program is offered from October to March.

Follow in the footsteps of thousands of families in Québec and register now for the Éconologis program!

ELIGIBILITY CRITERIA

For component 1*:

- > Receive an energy bill for home heating
- > Meet the income threshold

COMPONENT 1 *free!*

Receive a visit by an advisor and obtain practical advice about:

- > Heating
- > Hot water
- > Household appliances
- > Lighting

Take advantage of some of the following concrete measures based on the needs identified by an advisor:

- 1 Caulking and weatherstripping windows
- 2 Installing weatherstripping on doors
- 3 Insulating electrical outlets on outside walls
- 4 Installing low-flow showerheads
- 5 Installing aerators on water taps

COMPONENT 2 *free!*

Receive a visit from a specialist who will install your electronic thermostats to improve your comfort.²

For component 2*:

- > Have been visited by an advisor as part of Component 1
- > Obtain permission from the landlord

1 Except for wood as the primary source of heat.

2 Pre-existing system in compliance with the Québec Building Code required.

Note: Photos are for illustrative purposes only. Your electrician may choose to install a different electric thermostat model.

* Other criteria apply.
